EDUCATION

Singapore University of Technology and Design (SUTD) <ul style="list-style-type: none">Bachelor of Engineering (Engineering Product Development), HonoursPreferred Focus Track: RoboticsExpected Date of Graduation: August 2022	Singapore May 19 to Present
---	--

ACADEMIC PROJECTS & SELF-INITIATED PROJECTS

Singapore University of Technology and Design V2X Implementations, Team Coordinator & Software Specialist <ul style="list-style-type: none">Coordinating a team of 4 in studying and implementing the applications of V2X devices in real-life vehicles.	Singapore Sep 19 to Present
Olethros Bot Chief Developer <ul style="list-style-type: none">Developing a Telegram Bot in Python with miscellaneous commands for my current SUTD Class. Utilized MongoDB Atlas for database management and Microsoft Azure for cloud deployment.	Singapore Sep 19 to Present
OpenSUTD Landing Page Main Developer <ul style="list-style-type: none">Developed the landing page for OpenSUTD, an open-source movement dedicated to build a community in SUTD that embraces open sharing and collaboration. Utilized HTML, CSS and JavaScript to achieve a clean and elegant look for the webpage.	Singapore Sep 19 to Oct 19
The Spread Bot Chief Developer <ul style="list-style-type: none">Developed a Telegram Bot in Python for The Spread, a café/food bar in NUS Business School, with order and payment capabilities. Utilized PostgreSQL for database management and Heroku for cloud deployment.	Singapore Mar 19 to Sep 19
WhiteHacks@SG Team Leader <ul style="list-style-type: none">Participated in a 2-day cybersecurity workshop and penetration-testing competition.Managed to be in the top 10 out of about 50 groups (Team //TODO).	Singapore Feb 18
Energy Innovation Challenge Team Leader <ul style="list-style-type: none">Designed a solar thermophotovoltaic cell prototype as a proof of concept.Increased the efficiency and power output of a solar PV cell by about 15% by retrofitting thermoelectric cells to the cell's posterior.	Singapore May 17 to Jul 17
Arduino Weather Station Workshop Competition Software Developer <ul style="list-style-type: none">Assembled a weather station as a team of 3 from the provided components.Wrote Arduino code for the data collection of weather conditions around the venue.Obtained 12th place in terms of accuracy.	Singapore Mar 17

CO-CURRICULAR ACTIVITIES

SUTD Organisation of Autonomous Robotics Vice-President <ul style="list-style-type: none">Leading the organization of about 70 people strong together with the President with the objective of nurturing a committed robotics community by building skills to take on industry projects.Supervising the day-to-day operation and directing the culture, vision and mission of the club.Assisting the President in delegating work amongst an Executive Committee of 7 individuals.Working closely with the Secretary in settling administrative matters of the club.Monitored the logistics flow and manned MOMobot, an autonomous ground vehicle, for Singapore Maker Extravaganza 2019, an external event at which SOAR showcased our club projects.Assumed the position of Logistics IC for SUTD BuildSomething 2019, a week-long SolidWorks & Arduino workshop course held in collaboration with SUTD Entrepreneurship Centre, with the end product of a line-tracing robot.Manned Jessica, a robot barista, at Singapore MINDEF Innovation Symposium 2019, which was held at SUTD, to serve coffee for about 50 personnel.Improved the skills and proficiencies of about 30 members of the club by organizing 6 workshops that cover robotics and other technical concepts (SolidWorks, Arduino, PID, Git, Linux and ROS).Leading a project team in building a Stanford Doggo with a stretch goal of implementing autonomous navigation for the Doggo.	Singapore Jun 19 to Present
--	--

- Led a team of 10 in building a working 7 kg Linorobot with dimensions of 300x215x102mm, equipped with a ROS autonomous navigation stack.

WORK EXPERIENCES

Mathvision Enrichment Centre Pte. Ltd.

Singapore

Assistant Teacher

Mar 19 to May 19

- Taught Physics for the IB (SL and HL), Singapore-Cambridge GCE A-Level (H2), AT (Computational), EDEXCEL AS Level, EDEXCEL International GCSE (9-1) - Science Double Award, SAT and Cambridge IGCSE (Pure and Co-Science) syllabi.
- Taught Mathematics for the IGCSE - CIM (Core and Extended) and UKMT (JMC) syllabi.
- Rated by **75%** of students taught as **Excellent** and by **22%** of students taught as **Good**. The other 3% did not submit a rating.
- Had mastery of the content and ability to explain clearly and patiently.

ADDITIONAL INFORMATION

- Technical Skills:
 - ROS
 - C/C++
 - Python
 - JavaScript
 - HTML/CSS
- Language Proficiency:
 - English
 - Indonesian
- Interests:
 - Full-Stack Development
 - Robotics
 - Design Thinking
 - Teaching
